### **DETAILED ACTION**

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/15/2010 has been entered.

### **EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Patrick Smith on 8/23/2010.

Change claim 13, line 3, "configured to receive" to - - to receive - -;

Change claim 13, line 5, "configured to be connected" to - - to be connected - -;

Change claim 13, line 8, "configured to measure" to - - to measure - -;

***Reasons for Allowance***

3. Claims 1-2, 4-9, 11-13 and 17-21 and 23 are allowed.
4. The following is an examiner's statement for reasons for allowance:

With regard to claim 1, the prior art does not teach, suggest or render the obvious the claimed structure of "a method for determining the thickness of a layer of lacquer which is applied by electrophoretic immersion coating to an article, wherein the article for immersion coating is immersed in a lacquer immersion bath containing lacquer and forms an electrode which generates, together with at least one counter electrode, an electrical field comprising the following steps:

- a) determining the electrical charge flowing through the article during immersion coating,
- b) measuring the maximum starting current which flows through the article at the start of immersion coating:
- c) determining the surface of the article exposed to the lacquer, thereby using the maximum this measured starting current measured in step b) as an input value to determine the surface of the article exposed to the lacquer,
- d) determining the thickness of the layer of lacquer based on the electrical charge determined in step a) and the surface determined in step c)."

Claim 13 is considered to be allowable due to the inclusion of claim limitation: "a system for determining the thickness of a layer of lacquer which is applied by electrophoretic immersion coating to an article, comprising:

- an immersion bath which is to receive for receiving a lacquer in which the article can be immersed,
- a voltage source, having a first of which one pole, which is to be connected to the article, and a second pole, can be connected to the article and of which the other pole which is connected to at least one counter electrode reaching into the immersion bath,
- an ammeter which is to measure a current flowing through the article during immersion coating,
- a charge measurement apparatus which is to determine from the current measured by the ammeter for determining the electrical charge flowing through the article during immersion coating, and,
- a computer which is programmed
  - to store a maximum starting current which flows through the article at the start of immersion coating and which has been measured by the ammeter, and
  - to determine the surface of the article exposed to the lacquer, thereby using the stored maximum starting current as an input value, and
  - to determine the thickness of the layer of lacquer which is applied by electrophoretic immersion coating to the article, thereby using the charge measured by the charge measurement apparatus and the surface of the article as input values, determines the thickness of the layer of lacquer from the charge measured by the charge measurement apparatus and the surface of the article exposed to the lacquer, wherein the maximum starting current which flows through the article at the start of immersion coating can be

stored in the computer and utilized to determine the surface of the article exposed to the lacquer.”

Claims 2, 4-9 and 11-12 are considered to be allowable due to its dependency on allowable claim 1; claims 17-21 and 23 are considered to be allowable due to its dependency on allowable claim 13.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Any inquiry concerning this communication or earlier communications from the examiner should be directed to FARHANA HOQUE whose telephone number is (571)270-7543. The examiner can normally be reached on Monday - Friday 8:30-5:30pm.
